

# CannaGuard<sup>TM</sup> PRO

Patented Formula

## CannaGuard PRO<sup>TM</sup> vs BLEACH

Put your bleach back in the supply closet. **CannaGuard PRO** beats bleach, no matter how you measure.

## WHEN YOU COMPARE, THERE'S NO COMPARISON

| Metric   | CannaGuard <sup>TM</sup><br>PRO | Sodium Hypochlorite (Bleach)* |
|--|---------------------------------|-------------------------------|
| % of viruses and bacteria killed   | 99.9%                           | 99.9%                         |
| Kill Time  | 15 seconds**                    | 10 minutes*                   |
| Rinse with water?  | No                              | Yes                           |
| Signal Word Required   | Caution                         | Warning                       |
| Toxic (includes danger statement on label)   | No                              | Yes                           |
| Causes irreversible damage, burns skin   | No                              | Yes                           |
| Reactive with other chemicals or organic material  | No                              | Yes                           |
| pH   | 9.2                             | 12 (strong base)              |
| Discolor fabrics   | No                              | Yes                           |
| Corrosive to metals  | No                              | Yes                           |
| Strong odor  | No                              | Yes                           |
| Multi-Purpose Use: Cleaner, Degreaser, Heavy Duty Odor Eliminator, Virucide, Fungicide, Allergen Remover | Yes                             | No                            |

### A New Disinfecting Technology

**CannaGuard PRO** is the first to use Sodium Chlorite in such low concentrations - achieving the lowest toxicity category by the EPA - yet the fastest kill time, making it a superior antimicrobial agent. It's this technology that allows **CannaGuard PRO** to be so effective and safe to use without protective equipment. There truly is no comparison when it comes to disinfectants.
