g

## ALL STAGES

Sea Green is a game-changing "compost tea extract" that works throughout all stages of your plant's life-cycle to increase nutrient availability. Use Sea Green in conjunction with our nutrients or your existing feeding program.

- **Increase quantity and quality** of your product while increasing plant health and vigor.
- **Effective in soil or hydroponics, with organic or salt-based nutrients**, as our product will rapidly respond to any growing environment.
- **Buffer against salt and high EC** conditions associated with poor soil or heavy feeding.
- **See results quickly!** Sea Green hits the ground running, ready to breathe new life into your garden in a single application.
- **Promote a diversity of microbes** with Sea Green's regular application!
- **Replace many expensive bottles** with our concentrated formula! Organic chelators, surfactants, and amino acids are included for optimal microbial and plant support.

## the science of bio-fertility

Everything starts and ends with the soil. Feed the soil and the soil will feed the plants. Plants create sugars, roots exude sugars, those sugars feed specific biology, and the biology feeds the plants. Plants communicate with the soil biology to get the nutrients they require! This is the way nature designed it.

With a biologically balanced soil, the microbes do the heavy lifting for you. At Primordial Solutions we've made Mother Nature our business partner... Make Mother Nature your business partner too!

### feeding schedule

	veg	flower							
Week #		1	2	3	4	5	6	7	8
Rootamentary	3mL	3mL	3mL	3mL	2mL	1mL			
Sea Green	1mL	2mL	2mL	2mL	2mL	2mL	2mL	1mL	1mL
PaleoBloom	tea, top amend	tea	5-7mL	7-10mL	10-13mL	10-13mL	13-15mL	flush	flush
True Blooms		5mL	1mL	1mL	1mL	1mL	1mL		
Rates above are given in mL/gal SOIL DRENCH									
True Blooms		1mL	2mL	2mL	2mL	2mL	2mL	2mL	
Rate above are given in mL/gal FOLIAR									

We offer a comprehensive system designed to enhance or replace your existing fertilizer program: exactly what your plants need, when they need it! The Primordial Solutions line accelerates your plant's rooting, growth, flowering, and fruiting phases while balancing soil biology and chemistry naturally. We're the solution you've been looking for.

## PRIMORDIAL SOLUTIONS

FOR ALL STAGES OF PLANT GROWTH

www.primordialsolutions.com

# ROOTAMENTARY

## ROOTING

Rootamentary can be used during all stages of plant development to promote maximum root development. Use early as a root stimulator, throughout vegetative growth to ensure massive roots, and moderately in early flowering/fruiting as a supplemental nitrogen boost. More roots, more nutrients, more yield.

- ▶ **Increase plant growth response** with N-P-K and micro-minerals that encourage an optimal root zone.
- ▶ **Culture root growth promoting bacteria** with this specialized formula designed to catalyze their growth!
- ▶ **Stimulate root development** and plant metabolism with natural plant-based extracts and enzymes.
- ▶ **Regenerate roots** damaged by pests, infection, or heavy salts.

# TRUEBLOOMS

f

## FLOWERING

Abundant flower sites are the foundation of bountiful harvests. True Blooms supports the transition into flowering and accelerates flower development.

- ▶ **Reduce transition time** by signaling the rapid development of flowers and flower sites using natural microbial exudates.
- ▶ **Maximize genetic potential** at an accelerated rate.
- ▶ **Yield more** ahead of schedule!
- ▶ **Make phosphorus more available** as plants need it when applied as a soil drench by employing specialized microbes.
- ▶ **Suppress fungal infections** via "competitive exclusion."
- ▶ **Naturally derived and food-grade foliar spray** that can be applied until one week before harvest.

## FRUITING

Everything your plant needs for explosive fruiting and heroic harvests. This formula is biologically time released, because we understand that big things have small beginnings.

- ▶ **A one-part fruiting formula:** PaleoBloom uses a unique colloidal paramagnetic base that contains P/K, Ca/Mg, optimal micronutrients, trace elements & silica.
- ▶ **Improve crop quality** by expressing your plant's secondary characteristics more fully - expect more oils and more terpenes.
- ▶ **Expand production capacity** by shattering your best harvest record. Our product is heavy and dense... Your product will be too.
- ▶ **Sustained bioavailability** via the colloids in our formulation that wrap around soil particles.
- ▶ **Meet your plant's nutrient demand** by increasing bioavailability as your plant needs it.

PaleoBloom is derived from rocks... CRUSH IT!
