

DARK ***HEART*** NURSERY

Outgrow Your Expectations.

Since 2007, **Dark Heart Nursery** has specialized in cultivating high quality clones for growers across Northern California. Our years of experience allow us to bring you consistently premium clones from both popular and emerging genetic lines that will perform well in a variety of settings. We take pride in our work and continually adapt our process and selection to meet the diverse needs of growers large and small.

Growers who know trust Dark Heart.

WHAT MAKES DARK HEART NURSERY CLONES DIFFERENT?

There are two main reasons Dark Heart clones are different:

- They are “hardened off”
- They are substantially larger than other clones you might find at a dispensary – in side-by-side testing, an average of 20% larger.

This benefits growers because the starts are ready for high intensity lighting right away and can be given full strength nutrients (around 1200 ppm) immediately.

Bigger starts produce better plants because they have more developed foliage and roots.

The leaves are like the “power stations” of the plant. Through the photosynthetic process, they allow a plant to convert light into energy that it can use to grow. Having larger leaves is like having a larger solar array – the plant is able to collect more energy and grow faster.

Great roots also help a plant grow quickly. Roots collect water and mineral nutrients from soil and fertilizer. Most clones have fairly small root systems compared to their foliage. Because a plant will always strive to achieve a balance between its root system and foliage, clones will often have a “lag time” when first planted while the plant is focusing its energy on growing roots. During this period, the plant may show few signs of growth for several days.

Dark Heart clones reduce this lag period because the roots are already quite well established and allow the plant to grow vigorously. You will see strong growth right from the start.

ALIEN OG KUSH

Alien Kush adds some punch to the already
legendarily potent and tasty Tahoe OG Kush

ALIEN OG KUSH

General information

- **BREEDER:** Cali Connection
- **AVAILABILITY:** seeds, clones
- **TYPE:** 50/50 hybrid
- **GENETICS:** Tahoe OG Kush x Alien Kush (Las Vegas Purple Kush x Alien Technology)
- **DESCRIPTION:** Plant grows tight & slightly elongated buds, branches tend to stretch in the first few weeks of flowering.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** Alien Technology is a very special landrace Afghani strain that was brought back fairly recently from an unnamed village in Afghanistan. The other parts of the equation are Kyle Kushman's Las Vegas Purple Kush and the original Tahoe OG cut, which some believe to be the original OG Kush. The Alien OG cross was created and developed by Swerve of Cali Connection.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Heavy (for an OG strain)
- **GROW TIPS:** Does well in cubes or soilless mixes. Little to no skill required when growing this strain.

Patient Expectations

- **SCENT:** Spicy, fresh, earthy with sweet undertones, floral,
- **FLAVOR:** Piney sweetness with a hint of kushy spice that hangs in the back of your throat rather than hitting the tongue at the forefront.
- **EFFECTS:** Relaxing, warming, good for conversations with friends, reading, or being creative. The feeling starts off with a strong sativa rush to the head causing a productive and thoughtful mental state, then progresses into the indica effects of physical relief, providing relaxation to the body.
- **SUGGESTED MEDICAL USE:** glaucoma, joint pain, arthritis, muscle tension, migraines, multiple sclerosis, and possibly attention disorders

BLUE DREAM

Huge Yields – 50 to 100 percent more than other strains

BLUE DREAM

General information

- **BREEDER:** unknown
- **AVAILABILITY:** clone only
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** DJ Short's Blueberry x Santa Cruz Haze
- **DESCRIPTION:** Huge dense buds packed heavily with trichomes and coated finely with light colored orange hairs.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** Blue Dream began in the beach town of Santa Cruz, California as a medicinal clone. This excellent cross between Blueberry and Haze is a favored staple in most of the dispensaries in Northern California.

Growing Information

- **FLOWERING TIME:** 8-9 1/2 weeks
- **YIELD:** Heavy
- **GROW TIPS:** Grows bigger in hydro, but gets the best flavor in soil. It tends to grow as a single cola unless trained. Some fox-tailing late in flowering is common revealing its Haze lineage.

Patient Expectations

- **SCENT:** floral berry, spicy, woody, blueberry pie
- **FLAVOR:** classic haze with a tinge of floral berry
- **EFFECTS:** Uplifting, cerebral, energetic. Enjoy this bud outside in nature or use it to unwind after a long day. Patients appreciate the cerebral awareness followed by a calming body high. Good for an all-day remedy as its indica traits are not too overpowering.
- **SUGGESTED MEDICAL USE:** aches and pains, depression, anxiety, nausea, cachexia, appetite loss, bi-polar disorder, stress

CHEMDOG 4

A hard-hitting Sativa with immediate sensory alteration

CHEMDOG 4

General information

- **BREEDER:** unknown
- **AVAILABILITY:** seeds, clones
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** Chemdog phenotype
- **DESCRIPTION:** Chem4 has a tight bud structure with a large cola build producing plump buds heavy in trichome crystals. Forming dense light-green buds without the appearance of many hairs or leaves

History

- **GEOGRAPHIC ORIGIN:** Legend has it that it's the East Coast, USA
- **STORY:** Whether it originated in Massachusetts, Montana, or at a Grateful Dead Concert in Indiana, one thing is certain with this strain, it will send you cruising every time.

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Moderate to Heavy
- **GROW TIPS:** Chem4 grows very similar to OG Kush but with more vigor so pruning is highly suggested. It is also naturally resistant to most pests. Chem4 is the most commercial of the Chem line.

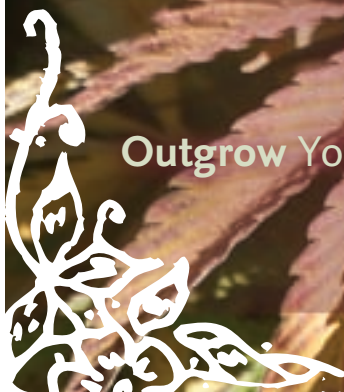

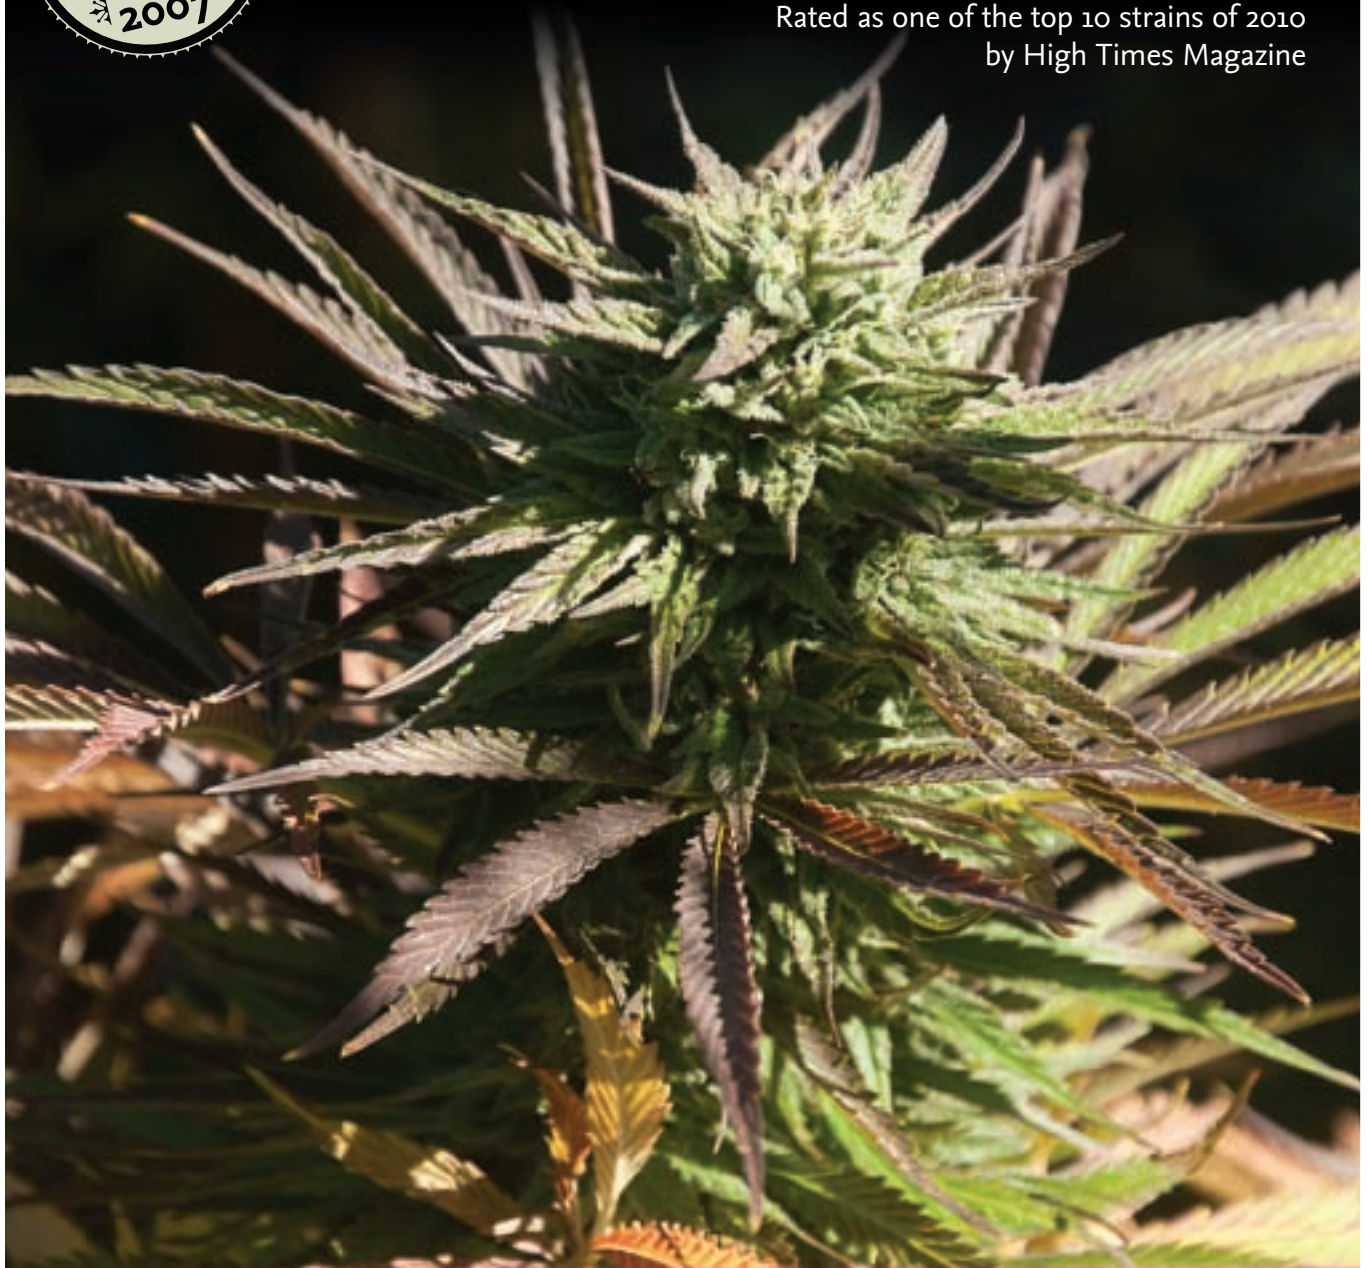

Patient Expectations

- **SCENT:** skunky, lemon- pine, acrid, diesel-fuel
- **FLAVOR:** sour, citrus, zesty
- **EFFECTS:** Heavy, couch lock, euphoria. Be ready for your cranium to blast off of your shoulders into the stratosphere. Be warned if you are not doing much you might doze off with your shoes on. Great for both indica and sativa bud lovers.
- **SUGGESTED MEDICAL USE:** neck and back pain, appetite loss, nausea, stress, glaucoma, arthritis, inflammation, insomnia, muscle spasms, Crohn's disease, and other gastrointestinal issues

CHERNOBYL

Rated as one of the top 10 strains of 2010
by High Times Magazine

Outgrow Your Expectations.

DARK 
HEART
NURSERY

CHERNOBYL

General information

- **BREEDER:** TGA Seeds
- **AVAILABILITY:** seeds, clones
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** Trainwreck x Trinity x Jack the Ripper
- **DESCRIPTION:** This strain includes the best qualities of Trainwreck finishing quick with large colas and high resin content. The buds are hard and dense and even a small bud is heavy.

History

- **GEOGRAPHIC ORIGIN:** Pacific Northwest, USA
- **STORY:** Originally bred by Subcool of TGA Seed, Chernobyl was rated as one of the top 10 strains of 2010 by High Times Magazine.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Medium to Heavy
- **GROW TIPS:** Does well indoors however if left untrained it can grow out of control. For maximum yield it is suggested to top early keeping the plant low, bushy, and compact.

Patient Expectations

- **SCENT:** sweet, citrus, lime, sherbet
- **FLAVOR:** creamy, zingy, fruity
- **EFFECTS:** Uplifting, energetic, creativity, long-lasting. On overall pleasant experience, Chernobyl is the perfect energizer for getting work done, exercising, or being creative. Be careful not to overdo it or you may experience some visual or auditory distortions.
- **SUGGESTED MEDICAL USE:** muscles aches, anxiety, stress, mood disorders, stomach aches, mouth pain, ocular pressure

CHERRY PIE

General information

- **BREEDER:** popularized by Berner
- **AVAILABILITY:** clone only
- **TYPE:** Indica-dominant hybrid
- **GENETICS:** Grand Daddy Purple x Durban Poison x OG Kush
- **DESCRIPTION:** Beautiful bursts of color, forest green with hues of maroon compacted into shiny resinous buds.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** Not quite the same Cherry Pie your grandma used to make- although just as delicious. Cherry Pie is thought to be Cherry Kush renamed.

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Moderate
- **GROW TIPS:** Unfortunately, Cherry Pie has a reputation of seeding up under stress. This is a plant best saved for expert growers with optimal conditions.

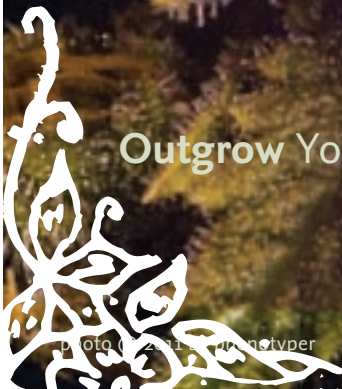

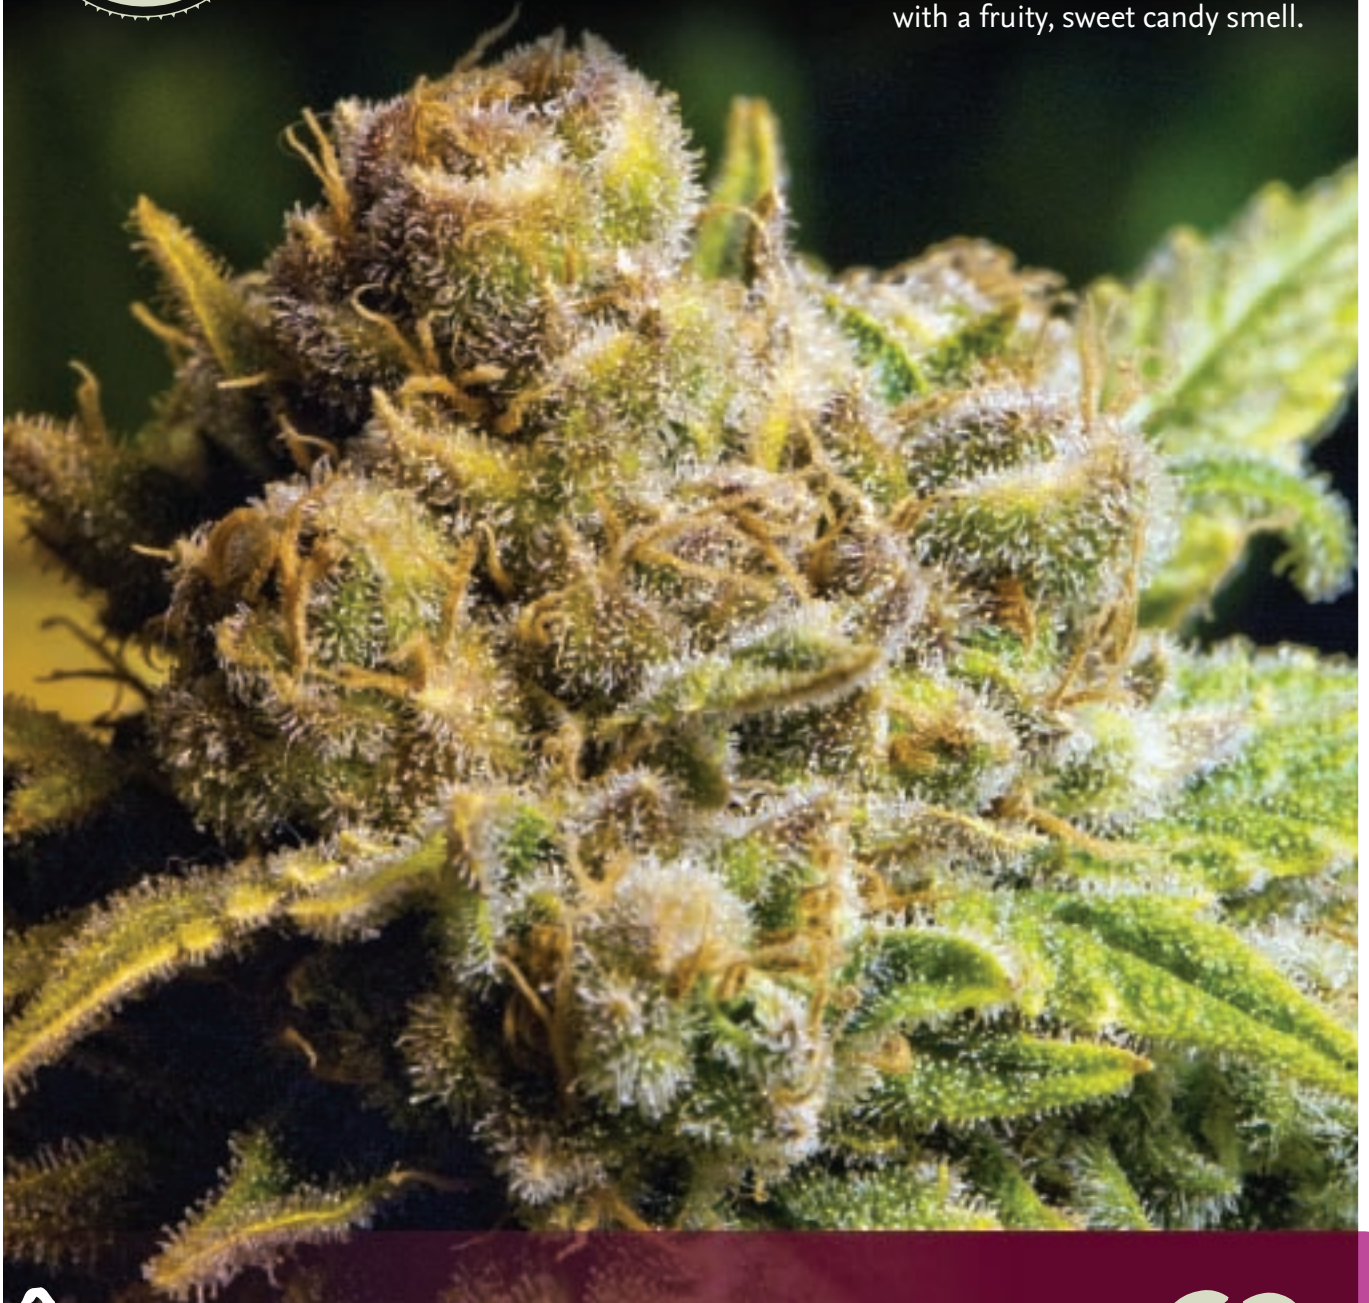

Patient Expectations

- **SCENT:** berry, perfume-like, strong aroma
- **FLAVOR:** distinct cherry flavor with a hashy, woody finish
- **EFFECTS:** Cerebral, stony, relaxing. This is the kind of strain you would want to indulge after a long day of work.
- **SUGGESTED MEDICAL USE:** pain, nausea, eating disorders, depression, anxiety, migraines, arthritis, insomnia

DREAM QUEEN

Top choice for smell – extremely pungent with a fruity, sweet candy smell.

DARK 
HEART
NURSERY

photo: 2014 - j. n. netvper

DREAM QUEEN

General information

- **BREEDER:** unknown
- **AVAILABILITY:** seeds, clones
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** Skunk #1 x unknown Afghani indica
- **DESCRIPTION:** This strain grows extremely fast producing huge silver dollar sized buds covered in a thick resinous frost.

History

- **GEOGRAPHIC ORIGIN:** Ohio, USA
- **STORY:** Dubbed Green Crack by Snoop Dogg himself (because of its high potency) this strain has had many names. It's been referred to as Green Kush, Green Crack, and recently now Dream Queen. Depending on where you look and who you ask, you will hear many stories of origination. Weather is was bred in Ohio by Cecil Kush using Skunk#1 x unknown indica or by Sierra foothill growers in Chico, CA using Blue Dream x Space Queen, this variety is sure to get you going full speed ahead.

Growing Information

- **FLOWERING TIME:** 7 ½-8 weeks
- **YIELD:** Heavy
- **GROW TIPS:** Super easy to grow (and clone) as she is not finicky as most plants. Watch out! She doubles in size during flowering.

Patient Expectations

- **SCENT:** skunky, sweet, earthy
- **FLAVOR:** tangy, fruity, tropical
- **EFFECTS:** Elevating, happy, euphoric mild, smoke that doesn't result in couch lock. It is a very light and subtle high, with a spacey cerebral effect adding a thin sheet of clarity making details more noticeable. It is a very uplifting and social high enjoyable for most any daytime activity.
- **SUGGESTED MEDICAL USE:** stress, anxiety, aches and pains, glaucoma, depression

FIRE OG KUSH

Top choice for smell – extremely pungent with a fruity, sweet candy smell.

Outgrow Your Expectations.

DARK 
HEART
NURSERY

FIRE OG KUSH

General information

- **BREEDER:** Cali Connection
- **TYPE:** Sativa- dominant hybrid
- **AVAILABILITY:** clone only
- **GENETICS:** Raskal's OG Kush x SFV OG Kush
- **DESCRIPTION:** Fire OG has frost covered, lime greenish buds packed heavy with red hairs giving the appearance of being on fire, hence the name Fire OG.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** unknown

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Moderate
- **GROW TIPS:** Recommended for intermediate to expert growers. We suggest letting this baby go to full term as bud swell and resin production double at the end of week 10 resulting in a super stony potent bud.

Patient Expectations

- **SCENT:** Lemon pledge, hints of sour pine
- **FLAVOR:** creamy earthiness, smooth, minty lemons
- **EFFECTS:** Sedative, warming, couch lock. Long lasting, this smoke is best saved for an evening of relaxation.
- **SUGGESTED MEDICAL USE:** insomnia, anxiety, stress, appetite loss, anorexia, joint pain, muscle pain

GIRL SCOUT COOKIES

General information

- **BREEDER:** popularized by Berner
- **AVAILABILITY:** clone only
- **TYPE:** Sativa- dominant hybrid
- **GENETICS:** Cherry Pie X OG Kush
- **DESCRIPTION:** Shades of light green give way to dark veins of purple, covered by an amber sheen of resin heads. However, one thing that stands out immediately about GSC is its incredible density of small tight bud structure.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** The clone only creation with a silly name, Girl Scout Cookies, definitely has hit the realm of legend in the Bay Area, commanding a higher price in dispensaries than other strains, and at one time the limited availability clones sold for hundreds of dollars each.

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Low to Moderate
- **GROW TIPS:** GSC is uber sensitive to stress so keep growing conditions optimal to avoid stunted growth. This strain is best suited for well experienced to expert growers.

Patient Expectations

- **SCENT:** earthy, piney, fruity
- **FLAVOR:** deep chocolate notes, mint, spice
- **EFFECTS:** euphoric, heavy, long lasting
- **SUGGESTED MEDICAL USE:** pain, muscle spasms, nausea, appetite, multiple sclerosis, cachexia, anxiety, PTSD, glaucoma, migraines, gastrointestinal issues, epilepsy, arthritis, appetite loss

NURSERY

GRAPE APE

General information

- **BREEDER:** Apothecary Genetics
- **TYPE:** Indica-dominant hybrid
- **AVAILABILITY:** clone only
- **GENETICS:** Afghani x Skunk # 1
- **DESCRIPTION:** The buds are big, dense and finishes in a unique purple coloring with pungent floral grape aromas.

History

- **GEOGRAPHIC ORIGIN:** Northern California
- **STORY:** Perhaps named after the late 1970's Hanna-Barbera cartoon, The Great Grape Ape Show, a rightful name since the buds are big, dense and purple like the Grape Ape character himself. The variety, Grape Ape, was created by long time cancer survivor and cannabis activist, Bret Bogue, also founder of Apothecary Genetics.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Medium
- **GROWING TIPS:** Keep this bush trimmed low and tight to increase density. Grape Ape is DHN's heaviest yielding purple strain.

Patient Expectations

- **SCENT:** spicy, woody, sharp, skunky
- **FLAVOR:** grape soda, sweet, floral
- **EFFECTS:** Uplifting then calming, euphoric, relaxing. This is a versatile smoke starting off with a cerebral uplift awakening the senses followed by a calming euphoric relaxed state of being.
- **SUGGESTED MEDICAL USE:** neck and back pain, body aches, insomnia, anxiety, stress, headaches

JILLY BEAN

Unbelievably sticky with a fair amount of trichome production
reeking pungent wafts of pineapple skunkiness

Outgrow Your Expectations.

DARK 
HEART
NURSERY

JILLY BEAN

General information

- **BREEDER:** TGA Seeds
- **AVAILABILITY:** seeds, clones
- **TYPE:** Indica – dominate hybrid
- **GENETICS:** Orange Velvet x Space Queen (Romulan x Cinderella 99)
- **DESCRIPTION:** Every cola might need to be supported because the tops get huge! It is unbelievably sticky with a fair amount of trichome production reeking pungent wafts of pineapple skunkiness.

History

- **GEOGRAPHIC ORIGINS:** Pacific Northwest, USA
- **STORY:** As stated in the Big Book of Buds 3, “Jilly Bean is the first strain bred by Green Avengers member Mz. Jill. Like jelly beans, Jilly “Beans” are seeds that promise a sweet, fruit-flavored, happy-making treat”.

Growing Information

- **FLOWERING TIME:** 7 -8 weeks
- **YIELD:** Moderate
- **GROW TIPS:** She yields best as a short bush with lots of side branches making this a perfect variety for SOG/SCROG methods. Add an extra week of veg time and Jilly Bean becomes extra robust. Drop nighttime temps by 20 degrees and she will hue reddish, burgundy, and purple tones on the leaves. Lower parts of the plant tend to develop popcorn buds so don't be afraid to keep the underside of the canopy trimmed up tightly.

Patient Expectations

- **SCENT:** sweet overripe mangos, pineapples, and oranges
- **FLAVOR:** zingy, citrus, fruity
- **EFFECTS:** Mellow, giddy, and friendly. The stone warms up slowly, spreading evenly over mind and body. This is a good daytime smoke inducing a feeling of mental ease and recharge. Also a great stealth strain for working professionals who appreciate the strain's induced mental alertness, increased energy, and improved mood.
- **SUGGESTED MEDICAL USE:** chronic pain, depression, glaucoma, depression, moodiness

JV86

General information

- **BREEDER:** Medi-Cone
- **AVAILABILITY:** clone only
- **TYPE:** 50/50 hybrid
- **GENETICS:** Trainwreck x Afghani
- **DESCRIPTION:** Produces several individual dense buds rather than long cola sized flowers.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** As for the name, JV is the initials of a former Medi-Cone collective member who assisted in breeding and stabilizing the strain. The 86 was for the year of his birth. JV was arrested on a marijuana offense, and worked out a deal to join the army to avoid jail time. He was then subsequently killed in Iraq leaving behind this amazing strain to be remembered by.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Moderate to Heavy
- **GROW TIPS:** Has a resistance to most pests and disease.

Patient Expectations

- **SCENT:** citrus, lime, similar flavor to Trainwreck
- **FLAVOR:** spicy
- **EFFECTS:** uplifting
- **SUGGESTED MEDICAL USE:** pain relief, minor anxiety, depression

KEN'S GRANDDADDY PURPLE

General information

- **BREEDER:** Ken Estes
- **AVAILABILITY:** seeds/ clones
- **TYPE:** Indica- dominant hybrid
- **GENETICS:** Purple Erkle x Big Bud
- **DESCRIPTION:** A hardy plant with tight internodes and a marvelous display of deep purple, blue, and red leaves during maturation. The buds stink up a storm in veg and flowering due to its extreme resin output.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** What makes Ken's GDP cuts different than most GDP cuts? Ken's GDP has been crossed back into itself creating a more potent, effective and robust strain.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Moderate
- **GROWING TIPS:** Sensitive to spider mites, regular weekly preventive pest treatments are recommended to avoid infestation or outbreaks during flowering.

Patient Expectations

- **SCENT:** hashy, fruity, smooth, sweet aftertaste
- **FLAVOR:** rich, smooth , earthy
- **EFFECTS:** Mental relaxation, creativity, energetic then calming. Ken's GDP produces no hangover or ill effects and is great for chatting, laughing, physical activity, appetite stimulation then sleeping like a baby.
- **SUGGESTED MEDICAL USE:** pain, insomnia, inflammation, anxiety, multiple sclerosis, appetite loss

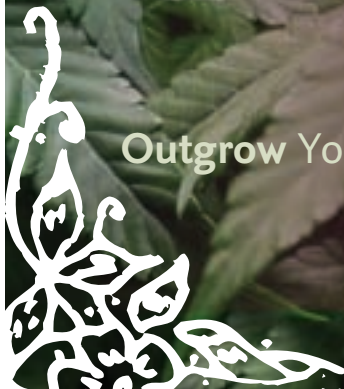

PLATINUM OG

General information

- **AVAILABILITY:** clone only
- **TYPE:** 100% Indica
- **GENETICS:** Master Kush x Afghani OR Purps x Master Kush x OG Kush
- **DESCRIPTION:** It's no wonder where the Platinum got the name. This kush strain is so completely covered in crystals it takes on an actual silvery platinum bling, beautifully adorned with purple hues and bright orange hairs.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** Platinum Kush is considered by many as the “ultimate” kush strain. Found in sunny California, not many strains compare to Platinum’s potent kush scent, taste, and effects.

Growing Information

- **FLOWERING TIME:** 9 weeks
- **YIELD:** Moderate

Patient Expectations

- **SCENT:** minty, lemony, skunky
- **FLAVOR:** sweet, tangy, floral,
- **EFFECTS:** Spacey, narcotic, happy, lazy. A nice heavy body high with a crazy thought provoking head high.
- **SUGGESTED MEDICAL USE:** stress, muscle spasm, spinal nerve pain, body aches, migraines, nausea

PURPLE KUSH

General information

- **BREEDER:** Coffeeshop Blue Sky
- **AVAILABILITY:** clone only
- **TYPE:** 100% Indica
- **GENETICS:** Hindu Kush x Purple Afghani
- **DESCRIPTION:** According to the Big Book of Buds, this lady forms a short squat bush with very dense internodes and huge fan leaves, staying in the 2-3 foot height range indoors. Purple Kush's foliage exhibits a classic indica growth pattern: a sturdy bush with dark green hues and hints of purple toward ripeness.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** Commercialized by Coffeeshop Blue Sky and its affiliate Oaksterdam University, this strain is a well-known favorite among local cannabis patients. Now closed due to a federal raid, Coffeeshop Blue Sky may be a fading memory but its ever so popular genetics are here to stay at Dark Heart Nursery.

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Moderate
- **GROWING TIPS:** With topping or pinching she will be at least as wide as she is tall. She does very well in SCROG setups.

Patient Expectations

- **SCENT:** soft pine, sweet, grapey, earthy
- **FLAVOR:** sweet, crisp, smooth, musky
- **EFFECTS:** Calming, relaxing, long-lasting. Eminently relaxing and rather potent, PK's onset comes with a slight rush of energy that subsides quickly leaving the body feeling comfortable and well medicated.
- **SUGGESTED MEDICAL USE:** chronic pain, insomnia, appetite loss, depression, spasms, tics, immobility, nausea, stress, anxiety, gastrointestinal issues, moodiness

ROMULAN GRAPEFRUIT

General information

- **BREEDER:** Next Generation Seed Company
- **AVAILABILITY:** seeds, clones
- **TYPE:** Indica-dominant hybrid
- **GENETICS:** Romulan x Grapefruit
- **DESCRIPTION:** Grows strong, hardy, and healthy with tender loving' care.

History

- **GEOGRAPHIC ORIGIN:** British Columbia, Canada
- **STORY:** Next Generation brings us Romulan Grapefruit, an F1 hybrid that is popular for its potency as well as favorable growing traits.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Heavy
- **GROWING TIPS:** Not a good pick for the low maintenance grower, she requires a fairly decent amount of care and attention which will revenue in the quality of finished product. On the upside, she's naturally resistant to common pests and diseases.

Patient Expectations

- **SCENT:** grapefruit, orange, citrus
- **FLAVOR:** mild, bland, hint of citrus undertones
- **EFFECTS:** The high is somewhat of a creeper beginning as an uplifting, relaxing body high that later induces couch lock.
- **SUGGESTED MEDICAL USE:** insomnia, chronic pain, stress, nausea, inflammation, arthritis, diabetes

SFV OG KUSH

General information

- **BREEDER:** Cali Connection
- **AVAILABILITY:** clone only
- **TYPE:** Indica- dominant hybrid
- **GENETICS:** SFV OG Kush x Afghani #1
- **DESCRIPTION:** A leggy plant with thick canopies, SFV OG grows rock hard dense buds. Beware though, she's a chugger and requires lots to drink preferring heavy doses of nutrient. A late bloomer, she packs on most of her weight in the last two weeks so be sure to ride her out till full term for the dankest results.

History

- **GEOGRAPHIC ORIGIN:** California, USA
- **STORY:** SFV OG Kush is a sub cut of the original "OG Kush". The "SFV" meaning San Fernando Valley, where this sub cut was first bred.

Growing Information

- **FLOWERING TIME:** 9-10 weeks
- **YIELD:** Moderate
- **GROWING TIPS:** A heavy topper (and a perfect variety for SCROG), pruning underneath branches where light is impenetrable is recommended for chunking up the buds. A thorough flush towards the end will have the nugs bursting with strong flavors of lemony goodness.

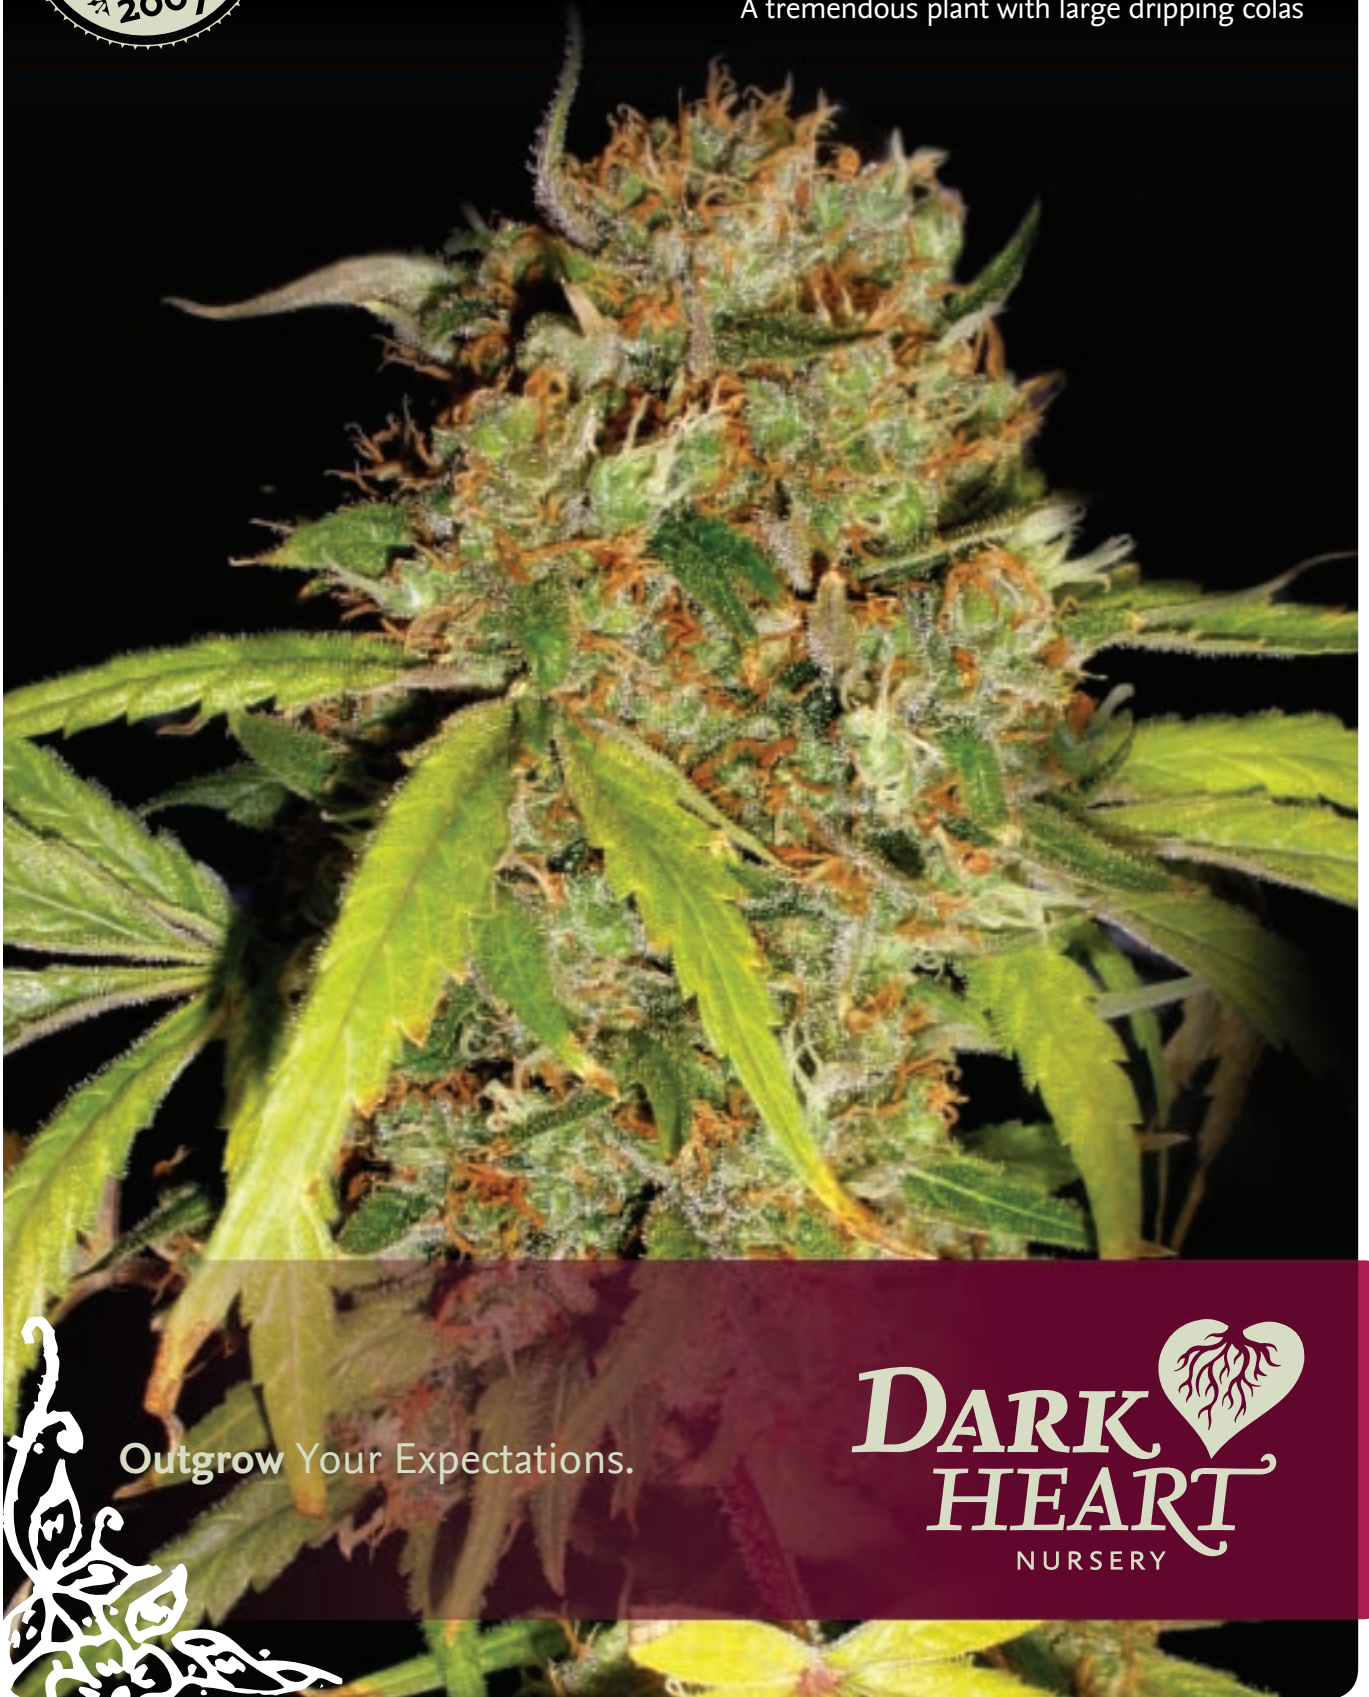

Patient Expectations

- **SCENT:** piney, citrus, fuel, floral, sweet
- **FLAVOR:** lemon pledge, pine sol, kerosene
- **EFFECTS:** peaceful, euphoric, clear. A nice even buzz that's not too stoney but not too light, it leaves the user in a calming meditative state of being.
- **SUGGESTED MEDICAL USE:** appetite loss, arthritis, back pain, body pain, cachexia, PMS, Crohn's disease, epilepsy, fibromyalgia, headaches, insomnia, multiple sclerosis, muscle spasms, PTSD,

SPACE QUEEN

A tremendous plant with large dripping colas

Outgrow Your Expectations.

DARK 
HEART
NURSERY

SPACE QUEEN

General information

- **BREEDER:** TGA seeds
- **AVAILABILITY:** seeds, clones
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** Romulan/Cinderella 99 x Orange Velvet
- **DESCRIPTION:** A tremendous plant with large dripping colas, she is lime-green in color with bright orange and red hues accented by brilliant resin production that sparkles like diamonds.

History

- **GEOGRAPHIC ORIGIN:** Pacific Northwest, USA
- **STORY:** Original Space Queen, initially bred by Vic High of BC Growers Association (BCGA), is now extinct. Brought back from Canada by TGA seeds, the original F2's were then crossed with Orange Velvet, creating the Space Queen we know today. Space Queen, sometimes dubbed Space Jill, is Subcool's and Mz.Jill's revamped version of the amazing lost cross.

Growing Information

- **FLOWERING TIME:** 8-9 weeks
- **YIELD:** Moderate
- **GROWING TIPS:** This baby grows thin and lanky so canopy support like SCROG provides the best crutch for your buds. Top early and super crop to reveal the plant's greatest results.

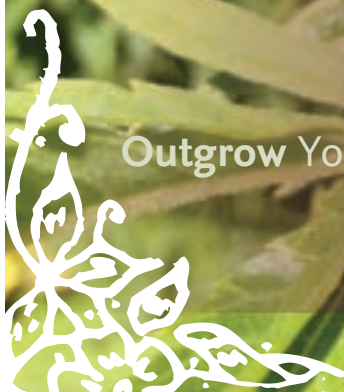

Patient Expectations

- **SCENT:** Potent punch of cherry and strawberry with sour pineapple, lemon haze flavor
- **FLAVOR:** fruity, sweet- sour, tropical
- **EFFECTS:** Happy, heady, uplifting and slightly psychedelic. A great choice for a daytime smoke, she will inspire you with a need to accomplish tasks.
- **SUGGESTED MEDICAL USE:** arthritis, inflammation, migraines, pain relief, nausea, depression, stress, moodiness

SOUR DIESEL

These plants are possibly some of the most stank and skunk smelling plants indoors

Outgrow Your Expectations.

DARK 
HEART
NURSERY

SOUR DIESEL

General information

- **BREEDER:** unknown
- **AVAILABILITY:** seeds, clones
- **TYPE:** Sativa-dominant hybrid
- **GENETICS:** (Mass Super Skunk x Original Diesel) or (ChemDawg x Mass Super Skunk/NL) exact lineage disputed
- **DESCRIPTION:** The plant itself is a fairly lanky one that tends to show lots of fox tailing when finished.

History

- **GEOGRAPHIC ORIGIN:** unknown
- **STORY:** The Sour D has a storied past and there is some argument how it was proliferated and who brought it from where. Sour Diesel is the founding father of three phenos we've come to love; Chemdog, OG Kush and Sour Diesel. Some rumors say it all started in Colorado then a pheno was taken to the East Coast where it was renamed ChemDog. Then, as the story goes ChemDog was taken to Cali and renamed OG Kush.

Growing Information

- **FLOWERING TIME:** Heavy
- **YIELD:** 10-12 weeks
- **GROW TIPS:** This makes for an easy grow since maintenance is low. However, this one is not a variety for those of you trying to grow like ninjas. Sour D is almost impossible to hide without any type of high quality filtration system as one carbon filter won't do the trick. These plants are possibly some of the most stank and skunk smelling plants indoors.

Patient Expectations

- **SCENT:** pungent blend of fuel, skunk, citrus, and spice
- **FLAVOR:** sweet yet musky, lemony zest, fuel undertones
- **EFFECTS:** Uplifting, psychotropic, racy. A rise in energy is the initial onset then the buzz settles into a strange state of relaxation, one that may be accompanied by a dizzying cerebral high.
- **SUGGESTED MEDICAL USE:** nerve pain, muscle pain, appetite loss, edema, epilepsy, fibromyalgia

3XCRAZY

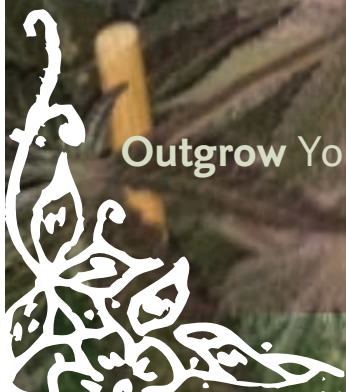

Thick waxy leave with more nodal space than the typical indica plant

WE'RE LOOKING FOR HIGH QUALITY PHOTOS OF DHN FLOWERS FOR THIS STRAIN!

* email your photos to info@dark-heart.net

Prizes rewarded if we like your photos and choose to use them!

HEART
NURSERY

3XCRAZY

General information

- **BREEDER:** DHN Source
- **AVAILABILITY:** clone only
- **TYPE:** Indica-dominant hybrid
- **GENETICS:** OG Kush, Bubba Kush, and Granddaddy Purple.
- **DESCRIPTION:** Thick waxy leave with more nodal space than the typical indica plant. Buds are a light green with purple and maroon hues.

History

- **GEOGRAPHIC ORIGIN:** San Francisco Bay Area, California, USA

Growing Information

- **FLOWERING TIME:** 7-8 weeks
- **YIELD:** Moderate
- **GROW TIPS:** Top and lollipop. (Lollipop refers to removing all the undergrowth so bud production is focused at the tops of the plant.)

Patient Expectations

- **SCENT:** Sweet

HAVE YOUR GROWN THIS DHN STRAIN BEFORE?

We're looking for variety info: grow tips, characteristics, aroma, flavor, effects, suggested medical use.

DARK 
HEART
NURSERY

THE WHITE

General information

- **BREEDER:** unknown, popularized by Krome
- **AVAILABILITY:** clone only
- **TYPE:** Indica- dominant hybrid
- **GENETICS:** unknown, but some speculate it's a Triangle phenotype (OG Kush x Purple Kush x Master Kush)
- **DESCRIPTION:** It has thin yet sturdy branches and tends to fill up a space quickly while displaying decent node spacing.

History

- **GEOGRAPHIC ORIGIN:** Florida, USA
- **STORY:** Named "The White" for the color of the finished buds (which absolutely drip with resin glands), this strain is thought to have come from bag seed of an elite Florida strain known as Triangle. Though it's not considered a true OG among most collectors, it's reached the status of OG cuts in terms of rarity and overall value. The potency tends to be the most noteworthy trait of the strain aside from its incredible appearance.

Growing Information

- **FLOWERING TIME:** 8 -8 ½ weeks
- **YIELD:** Moderate
- **GROWING TIPS:** Staking is recommended later in flowering, as the buds fill out nicely and the stems generally cannot support the weight. Early resin production fools most into premature harvest, but the last few weeks are when she really piles on the trichomes. A heavy feeder though not a heavy yielder, she is known for stretching tall so early topping is advised.

Patient Expectations

- **SCENT:** Lemon, pine, hashy
- **FLAVOR:** hints of mild pine, musk, and spice
- **EFFECTS:** Immediate, numbing, clear. A fairly functional experience, the mind remains active and acute while calming effects relieve the body without being overtly heavy. Relaxation and pain relief are its main medical qualities making for a great mid-day or twilight smoke.
- **SUGGESTED MEDICAL USE:** muscle spasms, pain relief, anxiety, glaucoma, head aches, moodiness, nerve pain, appetite loss, gastrointestinal issues
