

## Introducing the LF Series “Ballast Flip Flop”

Horti-Control Inc. is proud to introduce the LF series Ballast Switching Controller or “Flip Flop”. This device allows you to expand your growing area without having to increase power requirements or purchase additional ballasts. All you need is an additional Reflector and Bulb for each ballast in your system!

*Horti-Control LF-4 Series Front View*

*Horti-Control LF-4 Series Top View*

- Allows use of 2 bulbs on one ballast! (not simultaneously)
- Run lights in one area for 12 hours and then “Flip” to a second area for 12 hours.
- Prevents power surges by keeping ballast constantly on.
- Maximize available power by using all 24 hours of the days!
- No need to run additional power circuits.

-Works with magnetic core and digital ballasts.

-Plug and play with most popular lighting systems (adapters may be required).

-15' Piggyback Trigger cable allows daisy chaining additional controllers. Control them all with just one timer!

-Available in 2 ballast (LF-2), 4 ballast (LF-4), 8 ballast (LF-8), and 20 ballast (LF-20).
