	Week 8	Use only DNF CLEAR in reservoir during the final week. May be repeated 2-3 days prior to harvest.										2.5 ml per litre or 2 tsp per gallon	2.5 ml per litre or 2 tsp per gallon
	Mother Plants EC 2000	5 ml per litre or 4 tsp per gallon	5 ml per litre or 4 tsp per gallon	0	0	0	0	2.5 ml per litre or 2 tsp per gallon	2.5 ml per litre or 2 tsp per gallon	0	2.5 ml per litre or 2 tsp per gallon	0	2.5 ml per litre or 2 tsp per gal

EC values are based on water with an EC of 300.  
(Typical value of city tap water)

\*\* Add DNF Bloom Fortifier 0-50-30 before adjusting EC. Target EC values remain the same .  
NOTE:  
In soil or soilless mix: Use DNF Bloom Fortifier , DNF Veg Fortifier, DNF Black, DNF Gold and DNF Clear at double the recommended hydroponic strength.  
\*\*\* The rate for Carbo Logic remains the same in soil or soil less mix.

\* GRO formula is used for first two weeks of flowering cycle or until buds appear  
In Hydroponics pH balance water after nutrient is added Grow: pH 5.8 - 6.0 Bloom: pH 5.4 - 5.8  
In a soil and soilless media use DNF Gro & Bloom formula at ½ strength of the Hydroponics formula.  
Start each week off with a clean reservoir and top off throughout the week with plain water pH 5.8
