# Why Choose Sunshine Advanced?

Sure, there are plenty of mixes out there for indoor and outdoor gardening. But, only Sunshine Advanced is made to the exacting standards demanded by professional growers. A majority of North America's top professional growers depend on the Sunshine brand to ensure their crop's success. Growers know that they can count on Sunshine to deliver a precise, consistent product day in and day out. Give your home gardening project the same care that the pros do.

- Easy to use, advanced formulations are always consistent and take the guesswork out of growing.
- Natural and organic formulations are safe for veggies and other consumable crops.

- Formulated with earth-friendly ingredients from a company committed to sustainable practices.
- Sunshine Advanced is a great value. Get professional caliber products at a price that makes growing your own a smart choice.
- Satisfaction guaranteed. We'll refund your purchase price if you're not completely satisfied.
- Expert guidance: Get tips from the pros, our acclaimed team of horticulturalists, on our comprehensive website at [www.sunshineadvanced.com](http://www.sunshineadvanced.com)

The Science in Sunshine Advanced Mix #4 - The Sunshine Horticultural tech team is renowned for their scientific expertise and support of professional growers. They formulated Sunshine Advanced Mix #4 to provide these pro-preferred features:

**Balanced:** proper pH range to improve nutrient availability.

**Water Works:** organic wetting agent so soil absorbs water quickly and easily.

**Bio-Active:** multiple strains of mycorrhizae for optimum root colonization, improved nutrient and water uptake, better resistance to stress and disease.

**No-Burning:** inert formula accommodates custom feeding practices with no conflicting nutrients or burn risk.

**Peat Moss:** "nature's sponge" holds up to 30 times its weight in water, keeping it readily available for plant uptake.

**Coconut Coir:** another natural water-holding ingredient providing on-demand moisture for your plants.

**Perlite:** maintains air space for optimum root growth.

**Superior Value:** Eco-compressed bales fluff to about twice the labeled volume (1 cu ft bale provides about 2 cu ft of usable soil).
